

America's **Most Innovative Companies** 2026

Methodology

statista 

Based on a holistic methodology, America's Most Innovative Companies highlights companies on the forefront of innovation

Methodology summary

Relevance of Ranking

In a rapidly evolving global economy, **innovation is the cornerstone of sustained success**. "America's Most Innovative Companies 2026" recognizes organizations that lead the charge in fostering creativity, advancing technology, and driving transformational change. This ranking aims to **provide clarity and guidance** to stakeholders by identifying companies that excel in developing innovative products, streamlining processes, and cultivating a forward-thinking corporate culture. Highlighting these trailblazers not only **celebrates their achievements** but also inspires other organizations.

Executive Summary

- **Title of ranking:** America's Most Innovative Companies 2026
- **Media partner:** Fortune
- **Edition:** 4th
- **Number of awardees:** 300
- **Methodology:** Employee and expert surveys, patent data
- **Criteria used for determining the rank:**
 - Evaluation of three dimensions of innovation*
 - Product innovation
 - Process innovation
 - Innovation culture

Innovation was evaluated based on three dimensions

Definition of the dimensions used in this ranking

Product innovation

Product innovation comprises the regular **introduction of new products or services** and the regular **improvement of existing products and services**.

The number and relevance of industrial property rights in the form of **patents** are also part of this dimension.

Process innovation

This refers to the **development and use of new and innovative technologies and production processes** as well as the **innovative use of digitalization** and the resulting opportunities.

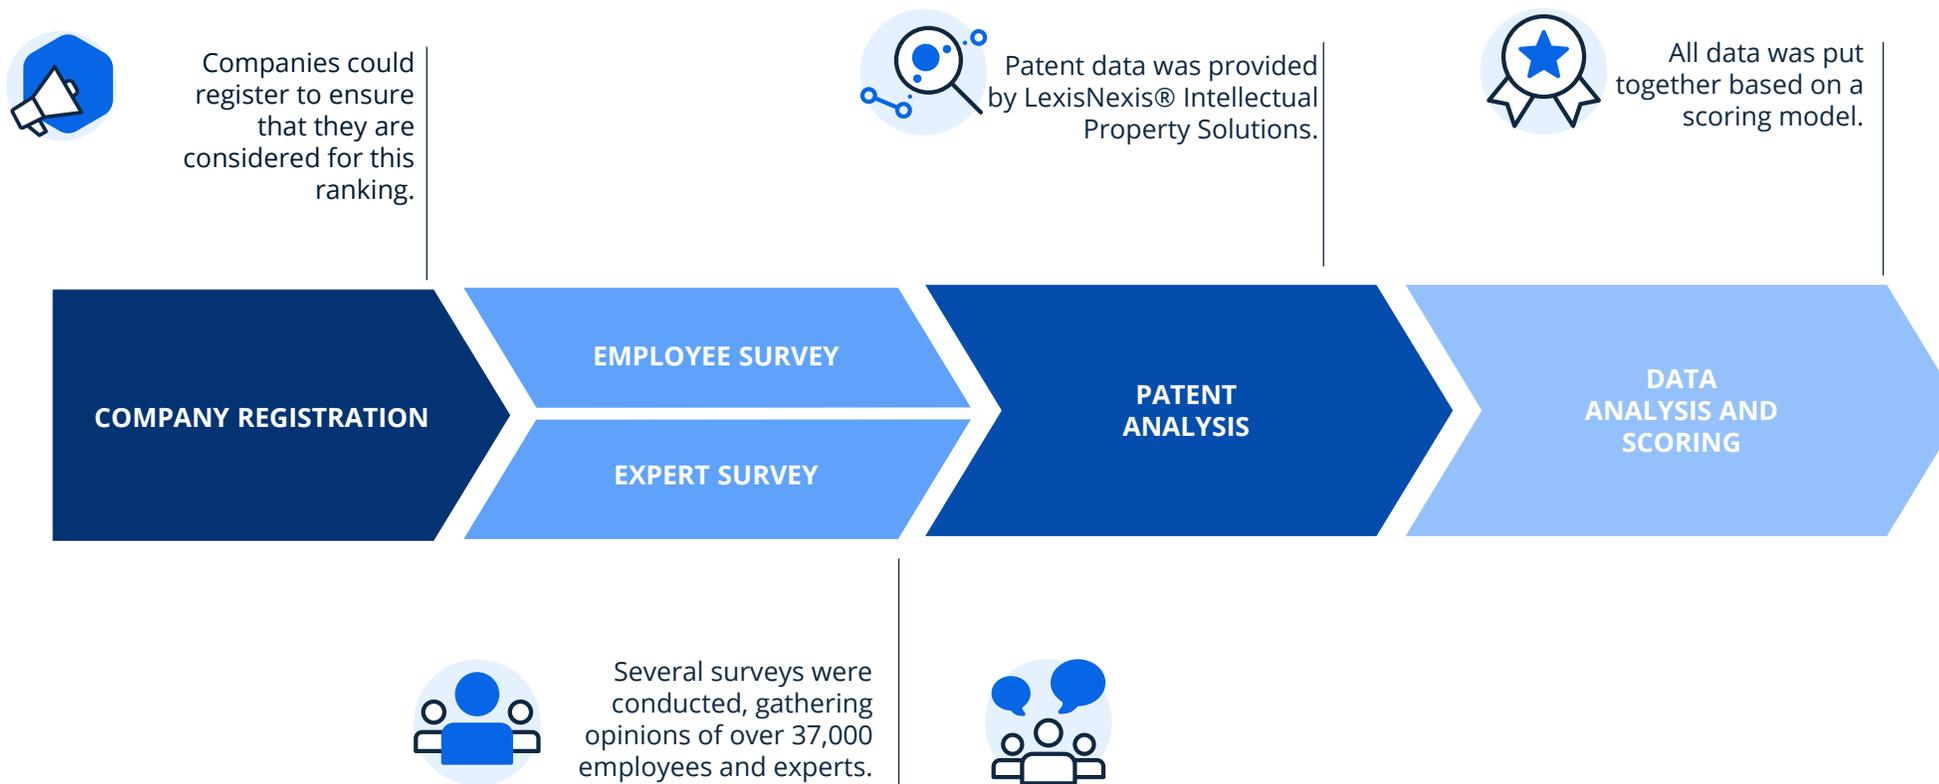

Innovation culture

Measures to what extent a company fosters **a spirit of entrepreneurship and creativity**, encouraging their employees to take initiative and develop new ideas.

A multi-layered process was implemented to achieve a comprehensive result

Data collection and analysis: Overview

All independent American companies were eligible for the list

Eligible companies and application phase

Eligible companies

To be considered for America's Most Innovative Companies¹ 2026, companies must meet the following criteria:

- **U.S. registered office:** The company's registered office is located in the United States.
- **Independence:** No other legal entity may hold, directly or indirectly, more than 50% of the company's share capital or voting rights. Ownership by two or more entities is permitted, provided that no single entity individually holds more than 50%.

Application

Companies which met the aforementioned criteria could register to be considered for the ranking.

Advertisement & Invitation

Fortune and Statista published an announcement article regarding the application phase.

In addition, Statista identified several hundred potential candidates through databases and other open sources.

For those companies, Statista sent invitations via email.

Several **surveys** were conducted to receive **internal and external views** on innovation

Data collection and analysis: Surveys

Company registration

- Companies could register via an online survey.
- They were asked to invite their employees to evaluate their innovativeness.
- **Around 4,000 employees** took part in this survey.

The employees represent the **internal view on innovation**.

Employee survey

- This survey was conducted via an **online access panel**, which consists of people that register to take part in online surveys.
- This survey was a representative sample of **over 30,000 employees** in the United States.

Expert survey

- Statista surveyed experts in various fields – from recruiters to business analysts, management consultants and people working in R&D or business development.
- In total, **over 3,000 experts** participated in the survey.

The experts represent the **external view on innovation**.

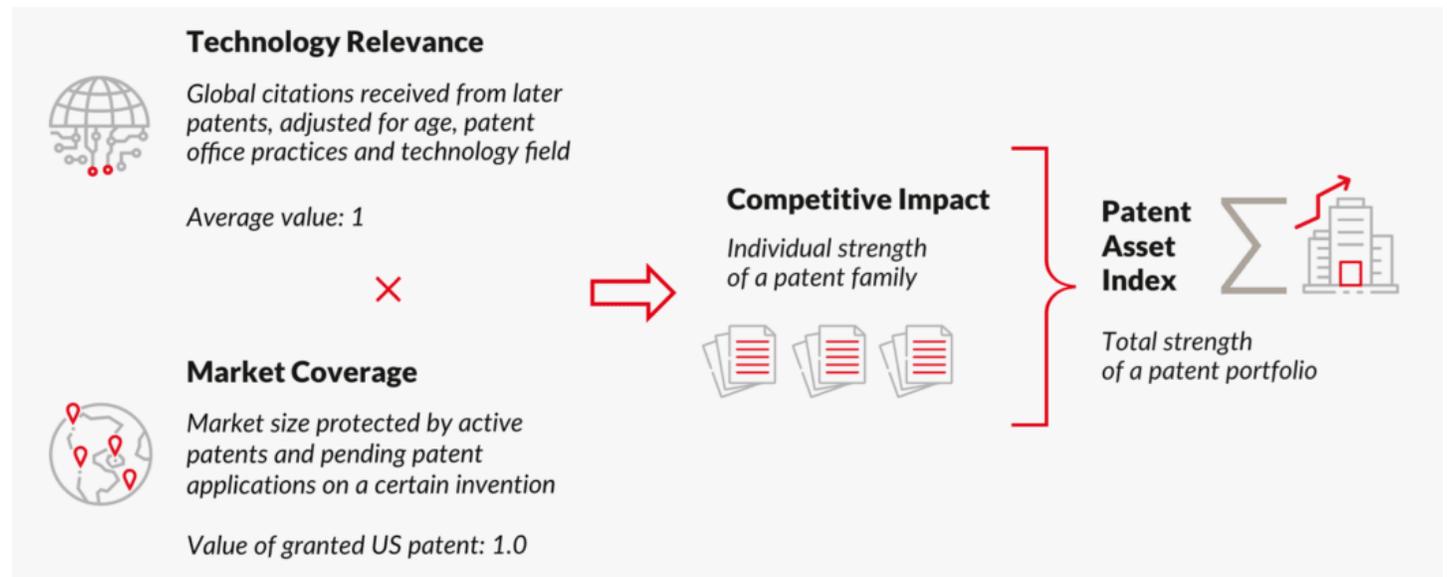

The total strength of a patent portfolio was considered based on the Patent Asset Index

Data collection: Patent analysis

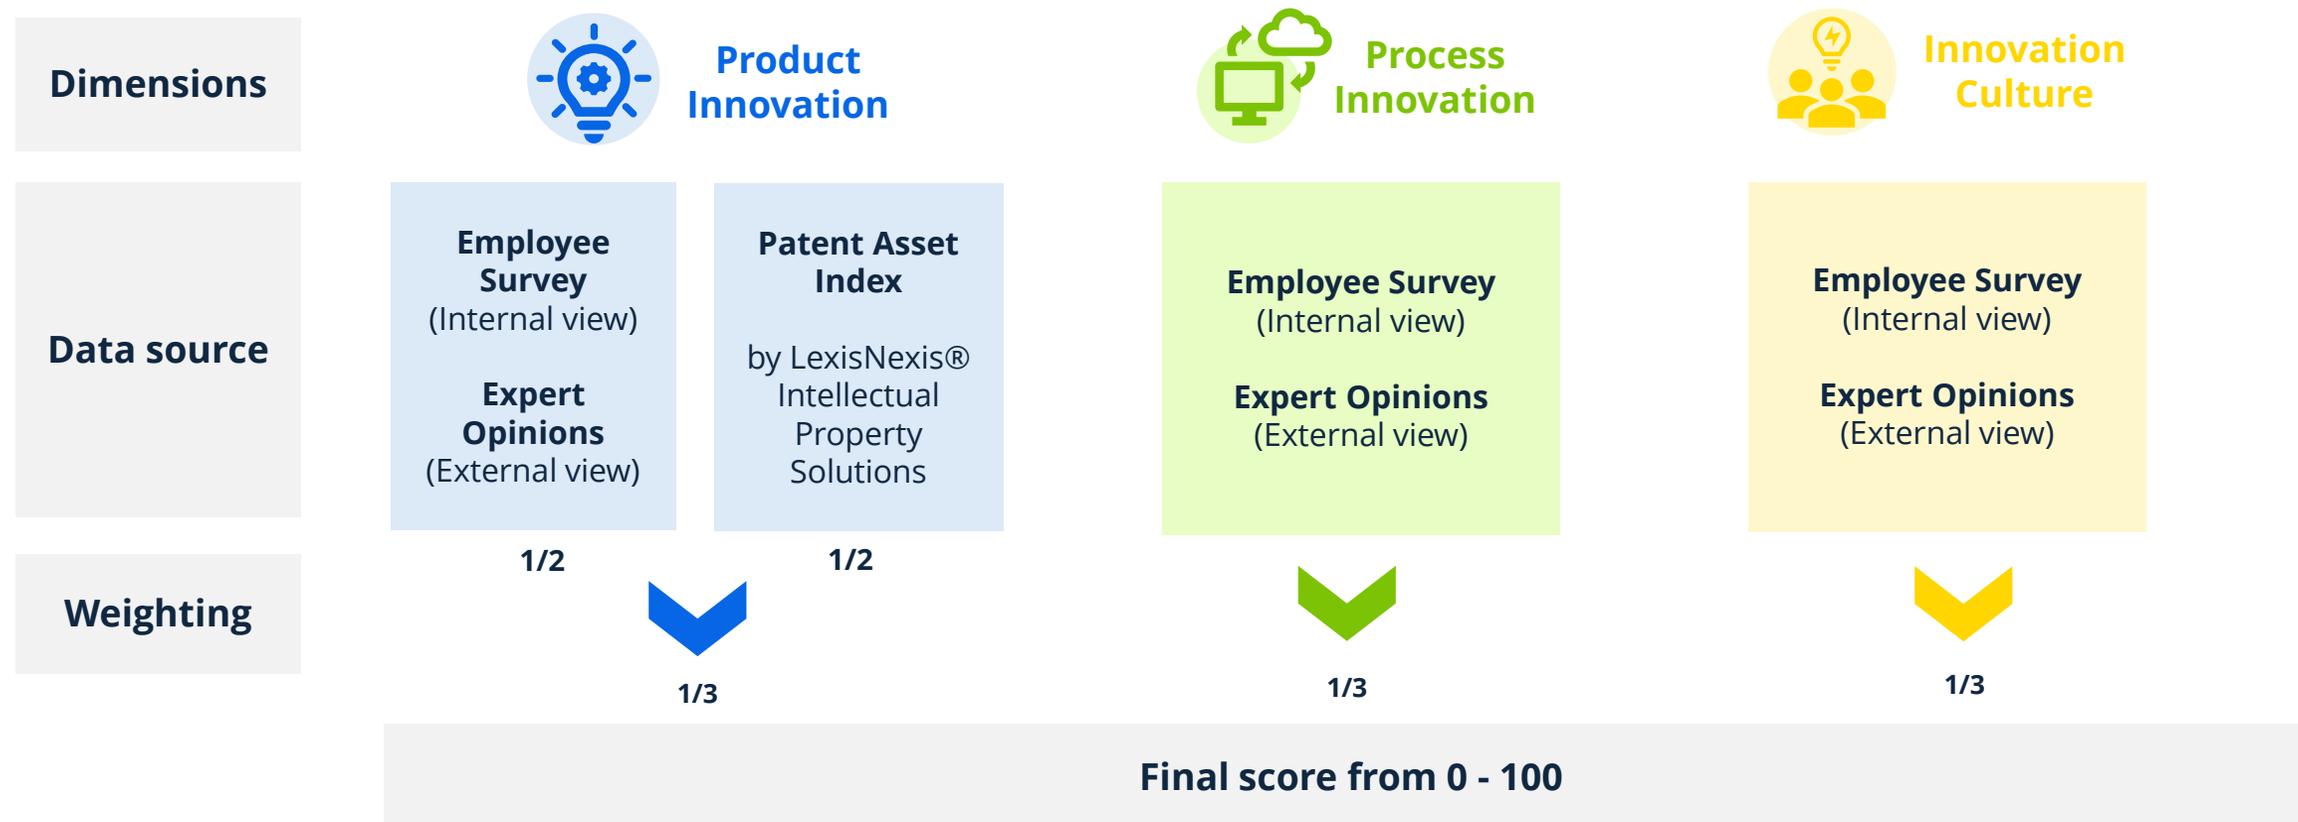

Patent Analysis

- The patent data was provided by LexisNexis® Intellectual Property Solutions.
- The LexisNexis® PatentSight+™ platform has patent data from over 130 million patent documents.
- For each company, the strength of a patent portfolio has been indicated by the Patent Asset Index.

All data was combined based on a balanced scoring model, assigning a score between 0 and 100 to each company

Scoring Model

The ranking represents 300 innovative American companies which are active in 17 different industries and come from 36 different states
