Singapore's Top Fintech Companies 2026

statista August 2025

TECHINASIA

Methodology – Singapore's Top Fintech Companies 2026

Summary

- For the first time, Tech in Asia and Statista are awarding the **"Singapore's Top Fintech Companies"** in seven different market segments. In total **95 companies** were awarded.
- The top list is based on the **analysis and weighting of overarching and segment specific KPIs** derived from the following **research methods:**
  - **Collection of publicly available data points**:
    Between June and August 2025, a team of analysts carried out in-depth research into relevant KPIs for a previously compiled longlist of eligible companies using publicly available sources such as annual reports, company websites and media monitoring.
  - **Open online application form**:
    In an open online application period from June 5 to August 10, 2025, announced and promoted via the Tech in Asia website, companies had the opportunity to be considered for the top list by submitting relevant KPIs.
- In the consideration for the top list, **overarching KPIs had a weight of 40%** while **segment specific KPIs had a weight of 60%** to derive the final score.

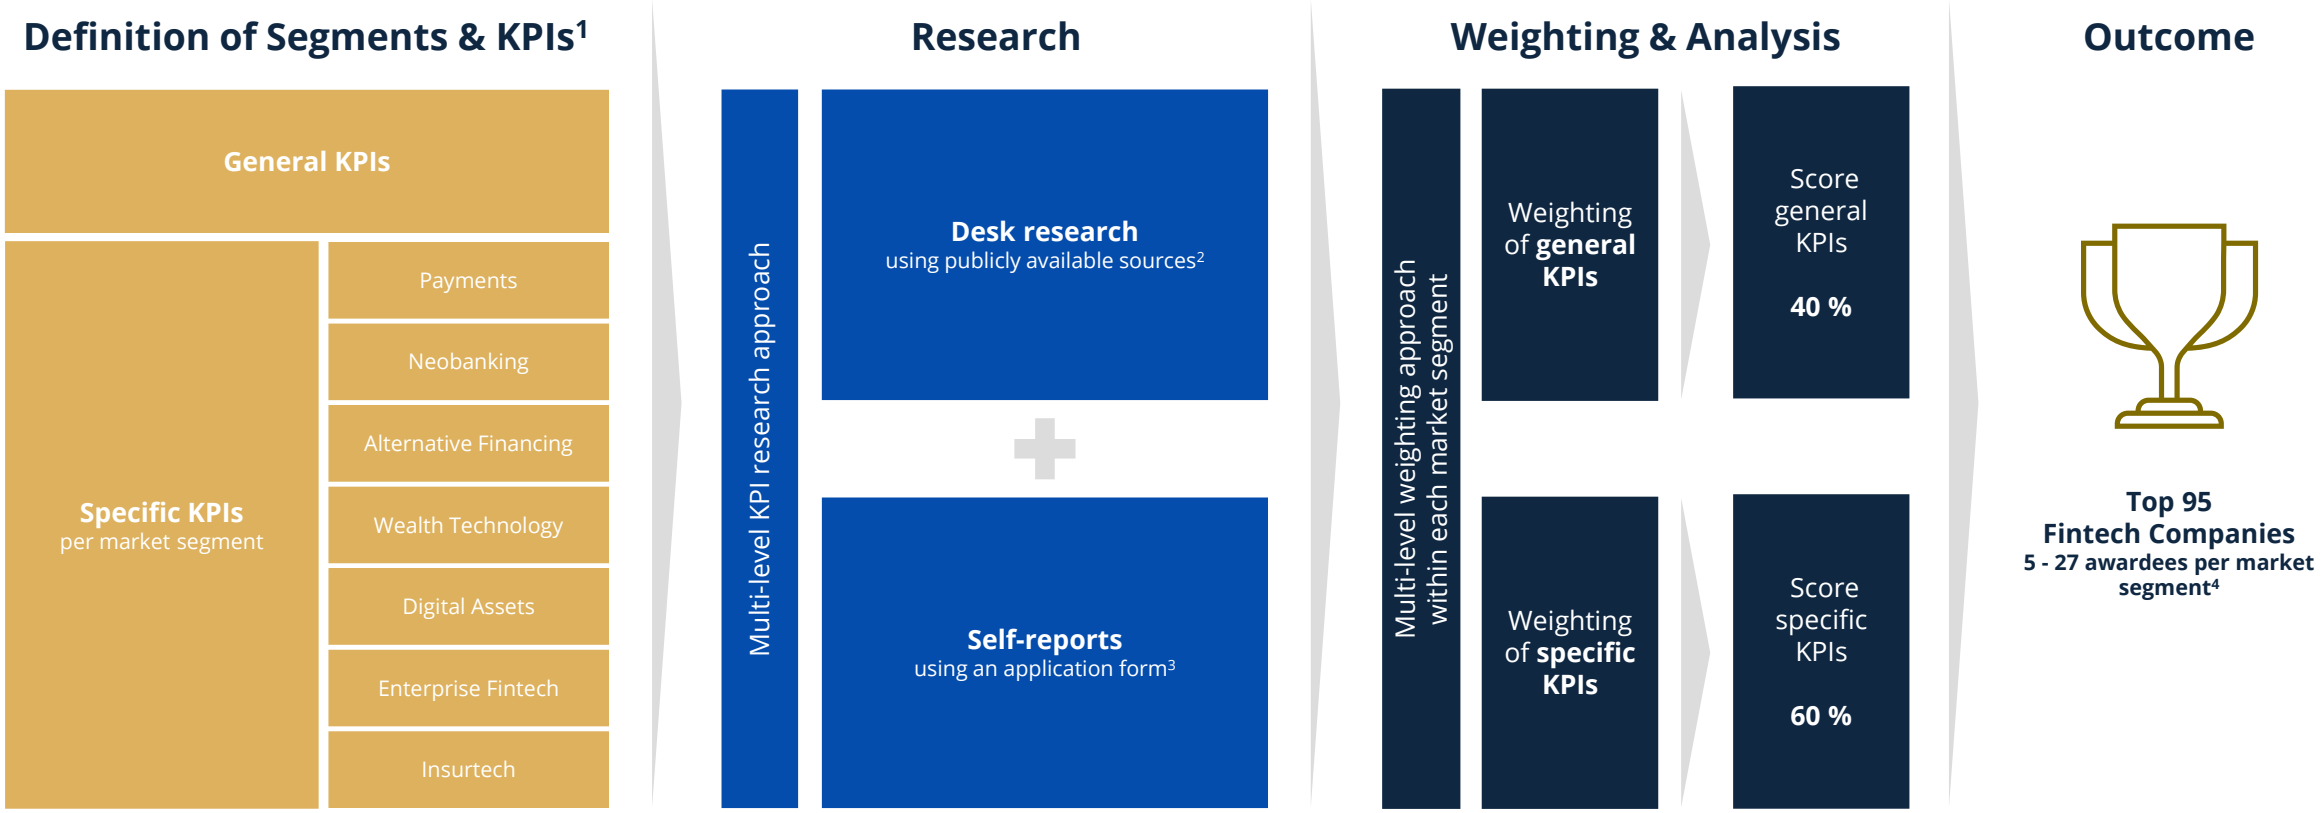

The companies with the highest score within their market segment were awarded as Singapore's Top Fintech Companies

Analysis and Weighting Model – Overview

Methodology

Notes:

[1] A team of analysts conducted a detailed analysis of the fintech market and divided it into seven segments. In some cases, the segments were subdivided into further sub-segments for better comparability of the companies. For each (sub)segment, several relevant KPIs were defined, which were used to evaluate the companies in addition to overarching KPIs.
[2] Datapoints were collected from publicly available sources such as annual reports, company websites or media monitoring.
[3] The open online application form was accessible via the Tech in Asia website from June 5 to August 10, 2025.
[4] The number of companies awarded per market segment varied depending on the size of the respected market segment and the outcome of the data research process.

RECOGNIZING THE BEST

The top list is composed of companies from seven different market segments

Segment Overview

PAYMENTS	The "Payments" segment includes providers of payment services, gateways, and solutions facilitating online purchases/point-of-sale (POS) transactions via mobile devices or digital money transfers between individuals or companies.
NEOBANKING	The "Neobanking" segment refers to digital-only financial institutions, known as neobanks, typically operate with minimal or no physical branch presence, providing banking or banking-like services accessible via mobile and desktop devices.
ALTERNATIVE FINANCING	The "Alternative Financing" segment includes companies offering digital, bank-independent financial services that give businesses and individuals access to funding and investment opportunities beyond traditional banking.
WEALTH TECHNOLOGY	The Wealth Technology segment encompasses companies offering digital solutions across the broader wealth management ecosystem. This includes platforms and tools for online trading, investment management, and portfolio optimization, as well as personal finance management software, financial comparison services, and digital infrastructure solutions.
DIGITAL ASSETS	The "Digital Assets" segment encompasses companies offering platform solutions and tools that streamline the utilization, development, and oversight of blockchain-based applications and digital assets, including cryptocurrencies and non-fungible tokens (NFTs).
ENTERPRISE FINTECH	The “Enterprise Fintech” category includes companies delivering technology-driven solutions for financial institutions and businesses. This encompasses Banking-as-a-Service (BaaS), Open Banking, Digital Identity, KYC/AML compliance, finance-related process automation, and solutions that enable companies to launch and scale financial products. These offerings aim to modernize banking infrastructure and enhance corporate financial workflows through scalable and secure technologies.
INSURTECH	The "Insurtech“ segment companies focus on developing or providing innovative, technology-based solutions and business models to enable, enhance and disrupt the insurance industry.

Disclaimer

The selection of the companies and the definition of the evaluation criteria were based on independent journalistic criteria of Tech in Asia and Statista. The evaluation was carried out by the statistics and market research company Statista. Tech in Asia and Statista make no claim to the completeness of the companies examined.

The ranking only includes companies that qualify according to the criteria described in this document. A position in the ranking is a positive recognition based on research of publicly available data sources at the time and information received via an application process.

In addition, events after August 29, 2025, were no longer considered in the analysis. As such, the results of this list should not be used as the sole source of information for future deliberations. The information provided through this top list should rather be considered in conjunction with other available information about a company.

The quality of companies that are not included in the ranking is not disputed.

Statista R, a branch of Statista, is the global leader in developing rankings for companies, brands, and products.
